# SETTING UP YOUR PARTNER

- 1 Plug the fully charged battery into the back of your Partner and press the power button.

2

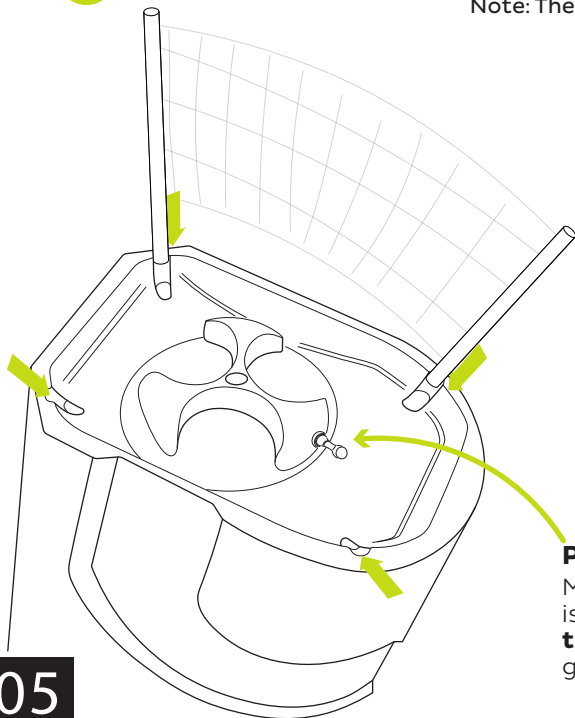

Place the Partner on the court, at the designated spot.

3

## Attach the ball hopper netting to the Partner

Note: The hopper is not square.

### Pro tip:

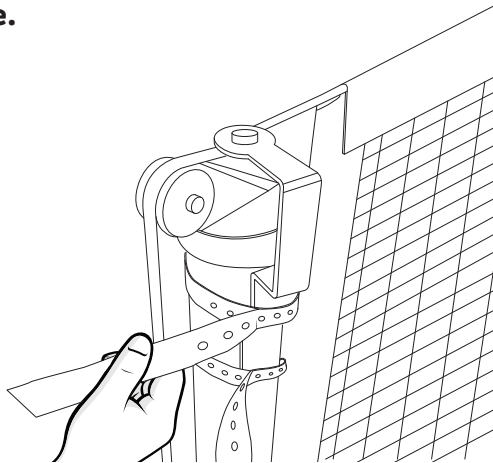

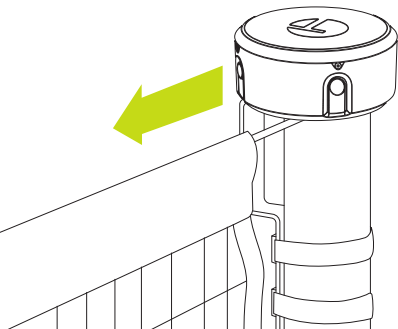

Make sure the ball agitator is tucked **out from under the netting** so it doesn't get stuck.

**4** Mount the Station Holder to either net post using the belts. The **tighter the belts** the better the **performance**.

Make sure the Holder is **mounted level** and the cameras are **facing both sides** of the court.

Turn on the Station

**Pro tip:**

Choose a net post facing opposite of the sun so the cameras can see properly.

5

Open the app and follow the directions to connect it to your Partner!
